

A terminal window titled "Terminal" with standard window controls (close, maximize, zoom). The terminal shows a user named "isabelbastos" on a machine named "penguin" in the home directory (~). The user has entered the command "git version", and the output is "git version 2.39.5". The prompt "isabelbastos@penguin:~\$" is shown again with a red cursor.

```
isabelbastos@penguin:~$ git version
git version 2.39.5
isabelbastos@penguin:~$
```
